

# Belzberg Remote Update Manager Client Agent Install - Quick Guide

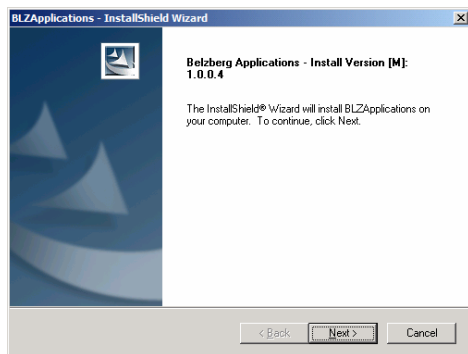

1. Open a web browser and go to <http://blzrum.belzberg.com>

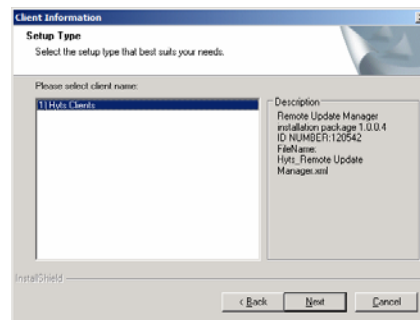

2. Click on the link – Install the Remote Update Manager client software...
3. Run the file in question. Depending on which browser software you use, you will be prompted as follows:  
*Internet Explorer:* Click on **Run**.  
*Firefox / Netscape Navigator:* Click on **Save File** and then **Open** in the Downloads window, or locate the downloaded file and double click on it to run.  
*Opera:* Click on **Open**.
4. If you are prompted that the “publisher could not be verified”, press **Run**.

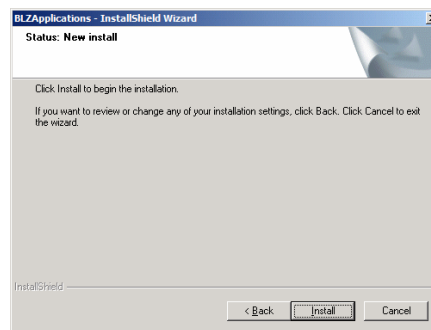

5. The Remote Update Manager installation will start. It will extract files and prepare itself for installation. When the installer is ready to proceed you will be prompted to press **Next >**.

6. Select the appropriate client name from the list displayed and press **Next**.

7. You will be prompted that the install is a new one, Status: New Install. Press **Next >** to continue.
8. You are given a final opportunity to go back and change any settings or cancel. To complete the install press **Install**.

9. The installation will take place and when complete (installation normally takes a few seconds) you will be prompted. Press **Finish** to exit the installer.
10. After the installer exits, the RUM Agent will run and will appear in the system tray (beside the clock at the bottom right of the desktop).

11. Double click on the RUM Agent icon to open the Agent. You will be prompted to enter your User ID (FIXNet ID). **This final step must be completed.** See the full manual for more details.

## Further Information

The full manual for the RUM Agent is available from the Belzberg RUM Portal website: <http://blzrum.belzberg.com> and also from the Support section of the main Belzberg website: <http://www.belzberg.com/support>
